

Thank you for your enquiry and congratulations on your upcoming Wedding!

Chances are that this is the first time you have ever booked a DJ so I have designed this info pack to not only educate you but help ease your mind that your Wedding Entertainment is in good hands.

Most couples don't realise that Entertainment is such a massive part of the success of your Wedding night! You want to make sure that when it comes time to party, that you and your family and friends have got a DJ that is going to rock the crowd!

We are a small team of equally talented DJ's that pride ourselves in helping our clients create awesome memories.

Our work with you far extends beyond just DJ'ing on the night. We like to build relationships with our clients to really get to know what type or style of music gets them, and all their friends and family in the mood for a memorable night!

We will be with you every step of the way leading up to the Wedding so feel free at any time to reach out and ask our advice for anything!

Every wedding set we create is unique and completely customised to your needs to reflect your taste or preferred musical format. We are not the cliché wedding DJ type who plays the exact same playlist week in week out.

We are devoted to our craft of the DJ. Being able to pick the right song at the right moment through continually reading and watching the crowd for reaction. Having an extensive musical knowledge and being able to seamlessly blend these songs together to keep your guests entrenched on the dancefloor. In my opinion if a DJ does not have these skills then you are seriously better off having an ipod.

We take pride in our DJ setup and equipment to ensure all gear is well maintained and there are no hiccups on the night. Therefore we do bring backup speakers and microphones in case the worst was to happen :)

Thanks again for your enquiry and please let me know if there is anything else I can do for you!
